## SunTegra® Solar Roof Now Available in Texas through Authorized Dealer Ja-Mar Roofing

**Port Chester, NY** — SunTegra, a leading provider of integrated solar roof systems, has partnered with Ja-Mar Roofing, an Austin-based, full-service roofing contractor that has been serving the Texas roofing market for over 45 years, to install the first-ever SunTegra Solar Roof in Texas.

The solar roof system installed in Austin, TX consists of seventy-two 105W SunTegra Shingles. The 7.56 kilowatt SunTegra Shingle solar roof will provide a projected 9,836 kilowatt-hours in its first year of energy production, offsetting an estimated 100% of the home's current annual energy use. The system replaced the need for over 500 ft<sup>2</sup> of asphalt shingle roofing.

“Our team is very pleased with the installation – we completed the project faster than expected and SunTegra provided on-site training for our crews throughout the install,” said Don Garritano, Solar Applications Specialist at Ja-Mar Roofing. “We are really looking forward to the next one. SunTegra is opening up new market opportunities for our company as well. We’re working with builders ready to begin offering the solar roof as a roof option in their new community developments.”

“Don and his team at Ja-Mar Roofing are best-in-class when it comes to a professional, honest, and experienced contractor,” said Mark Paille, VP of Sales and Marketing at SunTegra. “When entering a new region, we look for a growing target market and a partner that we can count on, and that is ready to grow with our organization. We’re excited for what’s to come this year with Ja-Mar Roofing and the Texas solar roofing market.”

The SunTegra Solar Roof attaches directly to the roof and integrates with the surrounding asphalt shingle roofing through an intermediary flashing. The solar roof system functions as both a solar panel and a roofing material.

Considering a SunTegra Solar Roof for your own home? Homeowners can reach out directly to Don Garritano at Ja-Mar Roofing to learn more about the SunTegra Solar Roof, discuss their needs, and receive a quote. Don can be reached at (866) 569-5547 or via email [don@jamarroofing.com](mailto:don@jamarroofing.com).

## **About SunTegra**

Founded by Oliver Koehler in 2013, SunTegra (formerly known as Integrated Solar Technology, LLC.) is a building-integrated solar products company offering homeowners and businesses aesthetically-pleasing, financially-viable alternatives to standard, rack-mounted solar panels. The SunTegra Solar Shingle and Solar Tile Roofs integrate into the way we live and build. By installing flush to the roof decking with no racking system needed and in place of traditional roofing materials, SunTegra systems are low-

profile and provide protection for the home. By leveraging the most proven solar energy technologies, SunTegra Solar Roofs are as efficient as standard solar panels and provide homeowners with the long-term energy bill savings that make solar a sound investment. SunTegra offers its Shingles and Tiles to homeowners and businesses through its Authorized Dealer Network consisting of roofers, builders, and solar contractors. The SunTegra Solar Shingles and Tiles are UL certified. For more information, see [www.suntegrasolar.com](http://www.suntegrasolar.com).

## **About Ja-Mar Roofing & Sheet Metal**
