## SunTegra® Partners with Murphy Brothers Contracting for First Solar Roof Installation in Stamford, CT

**Port Chester, NY** — SunTegra, an advanced Solar Roof manufacturer, has partnered with Murphy Brothers Contracting, a high-end custom home builder serving Westchester and Connecticut, to install the first-ever solar roof in Stamford, Connecticut.

The solar roof system installed on a waterfront home in Stamford, CT consisted of fifty five 105W SunTegra Shingles. The 5.8 kWp SunTegra Shingle solar roof is sized to provide an estimated 6,543 kWh per year and replaced the need for over 400 ft<sup>2</sup> of asphalt shingle roofing.

“Murphy Brothers Contracting believes that building green is simply building smart, and when we saw SunTegra solar roof shingles, we thought ‘Brilliant!’,” said Michael Murphy, of Murphy Brothers Contracting. “We frequently host educational events for architects and design professionals to showcase new innovative products. The event we held at this home received a lot of interest and gave attendees the opportunity to see a solar roof in real time operation!”

“We are excited to add such an experienced and prestigious home-builder, Murphy Brothers Contracting, to the SunTegra Authorized Dealer Network, said Mark Paille, VP of Sales and Marketing at SunTegra. “We are excited to have completed the first-ever solar roof project in Stamford and are continuing to introduce our SunTegra Shingle and SunTegra Tile to new partners and cities across the country.”

The SunTegra Solar Shingles attach directly to the roof and integrate with the surrounding asphalt shingle roofing through an intermediary flashing. The solar roof system functions as both a solar panel and a roofing material.

### **About SunTegra**

Founded by Oliver Koehler in 2013, SunTegra (formerly known as Integrated Solar Technology, LLC.) is a building-integrated solar products company offering homeowners and businesses aesthetically-pleasing, financially-viable alternatives to standard, rack-mounted solar panels. The SunTegra Solar Shingle and Solar Tile Roofs integrate into the way we live and build. By installing flush to the roof decking with no racking system needed and in place of traditional roofing materials, SunTegra systems are low-profile and provide protection for the home. By leveraging the most proven solar energy technologies, SunTegra Solar Roofs are as efficient as standard solar panels and provide homeowners with the long-term energy bill savings that make solar a sound investment. SunTegra offers its Shingles and Tiles to homeowners and businesses through its Authorized Dealer Network consisting of roofers, builders, and solar contractors. The SunTegra Solar Shingles and Tiles are UL certified. For more information, see [www.suntegrasolar.com](http://www.suntegrasolar.com).

### **About Murphy Brothers Contracting**

Murphy Brothers Contracting Inc. is owned and operated by brothers and partners, Chris and Sean Murphy. Celebrating their 38th year in the construction business, Murphy Brothers Contracting is known throughout the Westchester, Hudson Valley, southern Fairfield region for building and renovating beautifully designed custom homes as well as private clubs and equestrian estates, offering their clients the highest level of quality and professionalism in the industry. The company is currently completing the restoration, rebuild and renovation of the historic Ardsley Country Club, located in Dobbs Ferry, NY.
