

FOR IMMEDIATE RELEASE: April 9, 2013

**Solar Start-up Integrated Solar Technology officially formed as an LLC**

*Emerging company passes important milestone in path to commercializing innovative roof-integrated solar panels.*

**Larchmont, NY.** On April 9<sup>th</sup> 2013 Integrated Solar Technology was officially organized as a Limited Liability Company (LLC) by the State of New York State Department of State.

“I am very excited that Integrated Solar Technology, or IST for short, now has formed itself as a legal entity.” says company founder and CEO, Oliver Koehler. “This is an important step in IST’s path to develop and commercialize new and innovative roof-integrated solar panels which will not only generate clean energy from the sun, but also look great on a customer’s roof and provide additional roofing material savings up front and over the life of the system.”

Integrated Solar Technology has been working on the development of its roof-integrated solar products since end of 2012 and aims to bring its first product to market in Q1 of 2014.

**About Integrated Solar Technology (IST), LLC**

Integrated Solar Technology (IST) is dedicated to offering innovative product solutions to the solar, roofing and construction industries. These solutions will enable better integration with existing building design and construction practices, providing residential and commercial customers with [solar electric](#) systems that generate clean electricity from the sun, look great, are simple to install, and provide more cost savings than conventional solar electric systems. Staffed by industry veterans and based on proven technology, IST is building a team and products that customers can rely on. For more information, see [IST-Solar.com](#).
